Martin Carrington

Toronto, Ontario | martin [at] martincarrington.com | martincarrington.com | GitHub | LinkedIn

Technical Skills

PROGRAMMING LANGUAGES AND SKILLS: Python | R | Scala | Java | SQL | C | Bash | Git | Docker | Databricks | Azure
DATA SCIENCE: Pandas | NumPy | SciPy | Scikit-Learn | Data Visualization (Matplotlib) | Data Engineering | PySpark
MACHINE LEARNING: Time-Series Analysis | (Un)supervised Learning | TensorFlow

Education

M.Sc. in Computer Science | University of Toronto | June 2019
B.Sc. in Mathematical Physics | Queen's University | June 2017

Experience

STOCKMOOSE **2025 – Present**
Founder

KAISER PERMANENTE **December 2021 – May 2025**
Data Scientist

- Queried large databases of healthcare data. Wrote R, Python, and SQL code to support the data science team in the creation of products/dashboards. Developed analytics from many gigabytes of health records.
- Built data pipelines, trained, tuned and evaluated ML models (sklearn, AutoML), developed custom deployment and monitoring (Python) code on Azure/Databricks and other platforms.

FABRIIK (THE BAYESIAN GROUP) **May 2020 – August 2021**
Data Scientist / Quantitative Analyst

- Responsible for developing, backtesting, and assessing the risk of new trading algorithms. Performed data-driven research on the fundamental drivers of cryptocurrency asset prices using statistics/machine learning.
- Developed robust predictive models based on financial time-series and sentiment (NLP) data. Used Pandas and Scikit-Learn to create decision tree and linear regression models. Used Matplotlib and Seaborn to visualize key findings and share results. Worked with DevOps to deploy code into production (Docker, Kubernetes).

THE DATA INCUBATOR **January 2020 – March 2020**
Fellow

- Selected for a highly competitive fellowship (~2–3% acceptance) for graduate students moving into industry; capstone applied machine learning to real-world Yelp data to help businesses understand and improve their ratings.

UNIVERSITY of TORONTO **September 2017 – February 2019**
Research / Teaching Assistant

- Modeled the evolution of online social networks with Prof. Peter Marbach, writing MATLAB and Python simulations of community dynamics (published at GameNets 2019); led tutorials and graded for undergraduate Computer Science courses.

Publications

- Conference paper: Martin Carrington, Peter Marbach. Community structures in information networks. In: Game Theory for Networks – 8th International EAI Conference, GameNets 2019.
